ANALYTIC SUBJECT INDEX

PHYSICA B

Adiabatic flow (see *He II*) 146B (1987) 379
Al–Mn icosahedral phases
– Periodicity or quasiperiodicity in icosahedral Al–Mn phases? - Janot et al. 146B (1987) 351
Alloys (see *Al–Mn icosahedral phases*) 146B (1987) 351

Bound excitons
– Photoluminescence and infrared absorption studies of double acceptors in germanium - Thewalt et al. 146B (1987) 47
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– Shallow — in silver halides - Von der Osten 146B (1987) 240
– Electronic structure of — in semiconductors - Monemar et al. 146B (1987) 256
– Picosecond spectroscopy in III–V compounds and alloy semiconductors - Mariette 146B (1987) 286

C_2Cl_6
– Nucleation kinetics of polymorphic transition from phase II to phase III of hexachloroethane: Metastability/unstability - Koga 146B (1987) 408
Coherent phonons (see *Photodesorption, IR laser induced*) 146B (1987) 324

Density-functional theory
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176
Diffraction, low energy electron
– Spin polarization of low energy electrons scattered from magnetic surfaces - Stachulec 146B (1987) 398
Diffusion
– Hydrogen in Si: — and shallow impurity deactivation - Capizzi and Mittiga 146B (1987) 19
Doping profile
– Hydrogen in Si: diffusion and shallow impurity deactivation - Capizzi and Mittiga 146B (1987) 19
– Optical studies of shallow impurities in semiconductor quantum well structures - Delalande 146B (1987) 112
– Intracenter transitions in hydrogenic donors confined in GaAs–AlGaAs multiple quantum wells - Shanabrook 146B (1987) 121
Double donors / Double acceptors
– Spectroscopic studies of double donors in silicon - Grossmann et al. 146B (1987) 30
– Photoluminescence and infrared absorption studies of double acceptors in germanium - Thewalt et al. 146B (1987) 47
– Properties of the 78 meV acceptor in GaAs - Moore et al. 146B (1987) 65
– The oxygen donor in silicon - Stavola 146B (1987) 187

Effective-mass theory
– Shallow impurity states in semiconductors – the early years - Kohn 146B (1987) 1
– Spectroscopic studies of double donors in silicon - Grossmann et al. 146B (1987) 30
– Shallow impurity interactions and the metal–insulator transition - Bhatt 146B (1987) 99
– Optical studies of shallow impurities in semiconductor quantum well structures - Delalande 146B (1987) 112
– Shallow impurities in semiconductor quantum wells - Chang 146B (1987) 137
– Parity violation and electron-spin resonance of donors in semiconductors - Rodriguez 146B (1987) 212
Electron–phonon interaction (see *Superconductivity,high-T_c*) 146B (1987) 312
Electron spin resonance
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176
– Parity violation and electron-spin resonance of donors in semiconductors - Rodriguez 146B (1987) 212
Electrons, low energy (see *Diffraction, low energy electron*) 146B (1987) 398
Experimental techniques
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
Extended X-ray absorption fine structure (EXAFS)
– Lattice distortions around atomic substitutions in II–VI alloys - Balzarotti 146B (1987) 150
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176

Ferrous alloys (see *Si–Fe ribbons, microcrystalline*) 146B (1987) 416

Gallium arsenide
– Properties of the 78 meV acceptor in GaAs - Moore et al. 146B (1987) 65
– Optical studies of shallow impurities in semiconductor quantum well structures - Delalande 146B (1987) 112
– Intracenter transitions in hydrogenic donors confined in GaAs–AlGaAs multiple quantum wells - Shanabrook 146B (1987) 121
– Shallow impurities in semiconductor quantum wells - Chang 146B (1987) 137
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
– Picosecond spectroscopy in III–V compounds and alloy semiconductors - Mariette 146B (1987) 286
Gallium phosphide
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
Germanium
– Shallow impurity states in semiconductors – the early years - Kohn 146B (1987) 1
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
– Photoluminescence and infrared absorption studies of double acceptors in — - Thewalt et al. 146B (1987) 47
– Absorption strengths in the far-IR spectrum of shallow donors and acceptors in — - Rotsaert et al. 146B (1987) 75
– Zeeman spectroscopy of impurities in stress-induced uniaxial — - Fischer et al. 146B (1987) 80
– IR-spectroscopy of impurity complexes in — - Haller 146B (1987) 201

He II
– Adiabatic flow of superfluid — I. Thermohydrodynamic description with a new type mutual friction force - Satoh et al. 146B (1987) 379

Hydrogen-bonded solids
– Nonlinear mechanism for proton transfer in — - Gordon 146B (1987) 373
Hydrogen in semiconductors
– Hydrogen in Si: diffusion and shallow impurity deactivation - Capizzi and Mittiga 146B (1987) 19
– IR-spectroscopy of impurity complexes in germanium - Haller 146B (1987) 201
Icosahedral orientational symmetry (see *Al–Mn icosahedral phases*) 146B (1987) 351
II–VI compounds
– Lattice distortions around atomic substitutions in II–VI alloys - Balzarotti 146B (1987) 150
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
Impurity complexes
– Hydrogen in Si: diffusion and shallow impurity deactivation - Capizzi and Mittiga 146B (1987) 19
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– IR-spectroscopy of — in germanium - Haller 146B (1987) 201
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
Indium phosphide
– Picosecond spectroscopy in III–V compounds and alloy semiconductors - Mariette 146B (1987) 286
Infrared spectroscopy
– Spectroscopic studies of double donors in silicon - Grossmann et al. 146B (1987) 30
– Photoluminescence and infrared absorption studies of double acceptors in germanium - Thewalt et al. 146B (1987) 47
– Properties of the 78 meV acceptor in GaAs - Moore et al. 146B (1987) 65
– Absorption strengths in the far-IR spectrum of shallow donors and acceptors in germanium - Rotsaert et al. 146B (1987) 75
– Zeeman spectroscopy of impurities in stress-induced uniaxial germanium - Fischer et al. 146B (1987) 80
– Intracenter transitions in hydrogenic donors confined in GaAs–AlGaAs multiple quantum wells - Shanabrook 146B (1987) 121
– The oxygen donor in silicon - Stavola 146B (1987) 187
– IR-spectroscopy of impurity complexes in germanium - Haller 146B (1987) 201
Intermolecular energy transfer (see *Photodesorption, IR laser induced*) 146B (1987) 324
$La_2Cu_xO_{4-y}$ (see *Superconductivity,high–T_c*) 146B (1987) 307
Lattice relaxation
– Lattice distortions around atomic substitutions in II–VI alloys - Balzarotti 146B (1987) 150
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176
Line shape / Line intensity
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
– Absorption strengths in the far-IR spectrum of shallow donors and acceptors in germanium - Rotsaert et al. 146B (1987) 75
– Optical studies of shallow impurities in semiconductor quantum well structures - Delalande 146B (1987) 112
– Variational model of bound magnetic polaron and Raman spin flip line shape - Benoit à la Guillaume 146B (1987) 234
Luminescence
– Photoluminescence and infrared absorption studies of double acceptors in germanium - Thewalt et al. 146B (1987) 47

– Properties of the 78 meV acceptor in GaAs - Moore et al. 146B (1987) 65
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– Shallow bound excitons in silver halides - Von der Osten 146B (1987) 240
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
– Picosecond spectroscopy in III–V compounds and alloy semiconductors - Mariette 146B (1987) 286

Magnetic permeability disaccommodation (see *Si–Fe ribbons, microcrystalline*) 146B (1987) 416
Magnetic surfaces (see *Diffraction, low energy electron*) 146B (1987) 398
Magnetization (see *Plutonium monochalcogenides*) 146B (1987) 341
Magneto-spectroscopy
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
– Zeeman spectroscopy of impurities in stress-induced uniaxial germanium - Fischer et al. 146B (1987) 80
– Parity violation and electron-spin resonance of donors in semiconductors - Rodriguez 146B (1987) 212
– Electronic structure of bound excitons in semiconductors - Monemar et al. 146B (1987) 256
Metal–insulator transition
– Shallow impurity interactions and the — - Bhatt 146B (1987) 99
Metastability / unstability in polymorphic transitions (see C_2Cl_6) 146B (1987) 408

Neutron diffraction (see *Al–Mn icosahedral phases*) 146B (1987) 351
Neutron scattering (see *Plutonium monochalcogenides*) 146B (1987) 341
Nucleation kinetics (see C_2Cl_6) 146B (1987) 408

Photodesorption, IR laser induced
– Infrared-laser-induced photodesorption: Analysis of theoretical models - Fain and Lin 146B (1987) 324
Piezo spectroscopy
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
– Spectroscopic studies of double donors in silicon - Grossmann et al. 146B (1987) 30
– Photoluminescence and infrared absorption studies of double acceptors in germanium - Thewalt et al. 146B (1987) 47
– Zeeman spectroscopy of impurities in stress-induced uniaxial germanium - Fischer et al. 146B (1987) 80
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– Shallow impurities in semiconductor quantum wells - Chang 146B (1987) 137
– The oxygen donor in silicon - Stavola 146B (1987) 187
Plutonium monochalcogenides
– Neutron scattering and magnetization studies of — - Lander et al. 146B (1987) 341
Polarization (see *Diffraction, low energy electron*) 146B (1987) 398
Proton transfer (see *Hydrogen-bonded solids*) 146B (1987) 373
PuS (see *Plutonium monochalcogenides*) 146B (1987) 341
PuSe (see *Plutonium monochalcogenides*) 146B (1987) 341
PuTe (see *Plutonium monochalcogenides*) 146B (1987) 341

Quantum wells
– Optical studies of shallow impurities in semiconductor quantum well structures - Delalande 146B (1987) 112

– Intracenter transitions in hydrogenic donors confined in GaAs–AlGaAs multiple — - Shanabrook 146B (1987) 121
– Shallow impurities in semiconductor — - Chang 146B (1987) 137

Raman scattering
– Properties of the 78 meV acceptor in GaAs - Moore et al. 146B (1987) 65
– Intracenter transitions in hydrogenic donors confined in GaAs–AlGaAs multiple quantum wells - Shanabrook 146B (1987) 121
– Variational model of bound magnetic polaron and Raman spin flip line shape - Benoit à la Guillaume 146B (1987) 234

Semiconductor alloys
– Spectroscopic studies of the local symmetry of nitrogen pairs in GaP - Gil 146B (1987) 84
– Lattice distortions around atomic substitutions in II–VI alloys - Balzarotti 146B (1987) 150
– Shallow bound excitons in silver halides - Von der Osten 146B (1987) 240
– Picosecond spectroscopy in III–V compounds and alloy semiconductors - Mariette 146B (1987) 286
Si–Fe ribbons, microcrystalline
– Magnetic permeability disaccommodation in microcrystalline 6.5% Si–Fe ribbons - Ciurzyńska et al. 146B (1987) 416
Silicon
– Shallow impurity states in semiconductors – the early years - Kohn 146B (1987) 1
– Spectroscopy of shallow centers in semiconductors: progress since 1960 - Ramdas 146B (1987) 6
– Hydrogen in Si: diffusion and shallow impurity deactivation - Capizzi and Mittiga 146B (1987) 19
– Spectroscopic studies of double donors in — - Grossmann et al. 146B (1987) 30
– Shallow impurity interactions and the metal–insulator transition - Bhatt 146B (1987) 99
– Lattice relaxations at substitutional impurities in semiconductors - Scheffler 146B (1987) 176
– The oxygen donor in — - Stavola 146B (1987) 187
Silver halides
– Shallow bound excitons in — - Von der Osten 146B (1987) 240
Soliton theory (see *Superconductivity,high-T_c*) 146B (1987) 312
Solitons (see *Hydrogen-bonded solids*) 146B (1987) 373
Specific heat measurements (see *$YBa_2Cu_3O_7$*) 146B (1987) 319
Spin polarization (see *Diffraction, low energy electron*) 146B (1987) 398
Superconductivity, high-T_c
– Superconductivity of $La_2Cu_xO_{4-y}$ - Beille et al. 146B (1987) 307
– High-T_c superconductivity: A nonadiabatic theory of interacting solitons Sigmund et al. 146B (1987) 312
– Specific heat measurements of high-T_c superconductor $YBa_2Cu_3O_7$ between 78 K and 260 K - Van Miltenburg et al. 146B (1987) 319
Superfluid flow (see *He II*) 146B (1987) 379

Transitions, polymorphic (see *C_2Cl_6*) 146B (1987) 408

$YBa_2Cu_3O_7$
– Specific heat measurements of high-T_c superconductor — between 78 K and 260 K - Van Miltenburg et al. 146B (1987) 319

PHYSICA C

Palladium
– Analysis of the sixth spectrum of — (Pd VI) - Raassen and Van Kleef 146C (1987) 423
Pd VI (see *Palladium*) 146C (1987) 423

Spectrum of Pd VI (see *Palladium*) 146C (1987) 423
